

# TILELAB®

## MARBLE REFINISHER

- Removes light etching, water marks and dullness
- Restores mirror-like shine when machine polishing
- For polished marble, limestone, travertine and terrazzo

### PRODUCT DESCRIPTION

Specially formulated mixture of polishing chemicals and micro-abrasive powders for use in final-stage polishing of calcite stones. Restores a mirror-like appearance and removes light etching, water marks and dullness.

### USES

Polished marble, serpentine, terrazzo, travertine, limestone and onyx (calcite stones). Not formulated for use on granite.

### SURFACE PREPARATION

The stone surface must be clean, dry and free of waxes, coatings or finishes. Clean or strip wax or acrylic finishes with TileLab® Heavy-Duty Cleaner & Stripper. Allow to dry overnight before application.

### APPLICATION

Shake well before using. Safety glasses are recommended.

1. Apply directly from bottle in a sweeping motion over area to be polished. Use approximately 1/2 - 1 oz. for a 15 square foot area (15 - 30 ml/1.4 sq. m).
2. Sprinkle a small amount of water [1/2 oz. (15 ml)] over the same area. Use a white or hogs-hair polishing pad on a standard polishing machine (150 to 350 RPM). Begin polishing by moving the machine across the surface of the stone. The polishing time per square foot will vary from 5 to 20 seconds.
3. Clean the surface when finished polishing. Then buff with a clean, white polishing pad. Some stone surfaces may require additional polishing. After polishing is complete, seal the stone with SurfaceGard® Penetrating Sealer.

### COVERAGE

200 - 400 sq. ft. per pint (18 - 36 sq. m per 473 ml).

### CLEAN-UP

Clean tools and hands with soap and water immediately after use.

### PACKAGING

1 pint (473 ml) applicator bottle.

### ITEM CODE

TLMRPT

### CAUTION

Keep out of reach of children. Harmful if swallowed. Do not induce vomiting. Give plenty of water and call a physician immediately. If eye contact occurs, flush immediately with plenty of water for 15 minutes. If contact with sensitive skin occurs, wash with soap and water. Call physician if necessary. Do not mix with other solutions. Keep from freezing.
